

Sun™ StorEdge™ FC-100 Long Wave Gigabit Interface Converter Guide

Caution – LW GBIC performance depends upon the correct implementation of a 10 km Single Mode Optical Fiber Cable Plant which complies with the specifications provided in Section A.3 “Single Mode Cable Plant”.

A Sun sales representative must complete and submit a pre-sales agreement which certifies that your installation meets the above specifications before the sales order will be approved.

Preface

The *Sun StorEdge FC-100 Long Wave Gigabit Interface Converter Guide* explains how to install Sun™ StorEdge™ FC-100 Long Wave Gigabit Interface Converters (LW GBICs) into Sun disk arrays and hubs.

Using UNIX Commands

This document does not contain information on basic UNIX® commands and procedures such as shutting down the system, booting the system, and configuring devices.

See one or more of the following for this information:

- *Solaris Handbook for Sun Peripherals*
- AnswerBook™ online documentation for the Solaris™ software environment
- Other software documentation that you received with your system

Typographic Conventions

TABLE P-1 Typographic Conventions

| Typeface | Meaning | Examples |
|------------------|--|---|
| AaBbCc123 | The names of commands, files, and directories; on-screen computer output | Edit your <code>.login</code> file. Use <code>ls -a</code> to list all files. % You have mail. |
| AaBbCc123 | What you type, when contrasted with on-screen computer output | % su Password: |
| <i>AaBbCc123</i> | Book titles, new words or terms, words to be emphasized | Read Chapter 6 in the <i>User's Guide</i> . These are called <i>class</i> options. You <i>must</i> be superuser to do this. |
| | Command-line variable; replace with a real name or value | To delete a file, type <code>rm filename</code> . |

LW GBIC Installation and Removal

This chapter explains how to plan LW GBIC configurations and how to install and remove LW GBICs.

1.1 Planning the Configuration

This section shows the supported LW GBIC cabling guidelines in Sun StorEdge device configurations.

FIGURE 1-1 and FIGURE 1-2 show the supported configurations between initiators and the Sun StorEdge A5000 Disk Array and StorEdge FC-100 Hubs. Use these illustrations in conjunction with the information in the *Sun StorEdge A5000 Disk Array Hardware Configuration Guide*, part number 805-0264-xx, to plan your configuration.

The LW GBIC can be inserted into host adapter cards or Sun™ Enterprise™ SBus+ I/O Boards.

Note – LW GBICs must be connected in pairs.

Additional configurations may become available in the future. For an updated list of supported configurations, go to the “Storage & Peripherals” section of the `docs.sun.com` web site and read the *Sun StorEdge A5000 Installation Supplement*:

`http://docs.sun.com`

FIGURE 1-1 LW GBIC Configuration Between Initiators and a Single Disk Array

TABLE 1-1 Index to FIGURE 1-1

| Number | Component |
|--------|---|
| LW1 | LW GBIC |
| LW2 | 15m single-mode fiber optic cable |
| LW3 | Wall or socket connection |
| LW4 | Up to 10K single-mode fiber optic cable |
| LW5 | Wall or socket connection |
| LW6 | 15m single-mode fiber optic cable |
| LW7 | LW GBIC |

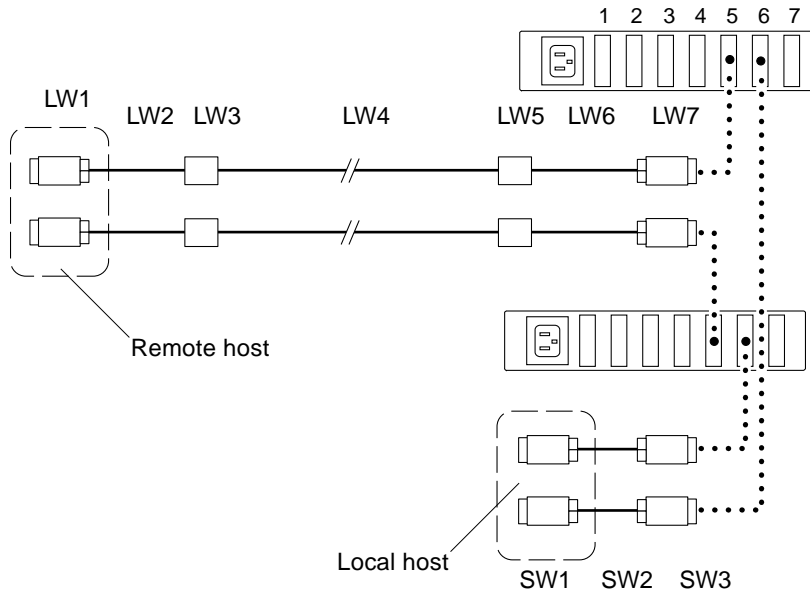

FIGURE 1-2 LW GBIC Configuration Between Initiators and StorEdge FC-100 Hub

TABLE 1-2 Index to FIGURE 1-2

| Number | Component |
|--------|---|
| LW1 | LW GBIC |
| LW2 | 15m single-mode fiber optic cable |
| LW3 | Wall or socket connection |
| LW4 | Up to 10K single-mode fiber optic cable |
| LW5 | Wall or socket connection |
| LW6 | 15m single-mode fiber optic cable |
| LW7 | LW GBIC |
| SW1 | SW GBIC ¹ |
| SW2 | Fiber optic cable |
| SW3 | SW GBIC |

1. SW GBIC refers to the multi mode 500m default GBIC used in Sun StorEdge A5000 Disk Array factory configurations.

1.2

Installing the LW GBIC

Caution – Forcing a LW GBIC into a port can damage the LW GBIC and/or the port. Use minimal pressure when inserting the LW GBIC.

1. Unwrap the LW GBIC and pull out the dust covers.
2. With the bail in the unlock position, insert the LW GBIC into the port. The unlock position is with the bail near the top of the LW GBIC (FIGURE 1-3).

LW GBICs are keyed to prevent improper insertion; they can be installed only as shown below.

FIGURE 1-3 Installing the LW GBIC

3. Move the bail down into the locked position (FIGURE 1-4).

FIGURE 1-4 Moving the Tab Into the Locked Position

4. Pull lightly on the bail to ensure that it is properly locked into place.
5. Connect a fiber optic cable to the LW GBIC (FIGURE 1-5).

Fiber optic cables are keyed to prevent improper insertion; they can be installed only as shown below.

FIGURE 1-5 Connecting the Fiber Optic Cable

1.3 Removing the LW GBIC

1. Disconnect the fiber optic cable connector from the LW GBIC.

Caution – You must remove the fiber optic cable from the LW GBIC before removing the LW GBIC.

2. Move the bail to the unlocked position (FIGURE 1-6).

FIGURE 1-6 Moving the Bail to the Unlocked Position

3. Pull on the bail's plastic tab to remove the LW GBIC.

1.4 Maintaining Fiber Optic Cables

Caution – Follow these guidelines to avoid causing damage to fiber optic cables.

The minimum bend radius for fiber optic cables is 1.2 inches (3 cm).

Make sure to grasp the connector when disconnecting a fiber optic cable. Never disconnect a fiber optic cable by pulling on the cable.

To avoid damage due to contamination or abrasion, always put dust covers on the fiber optic cable connectors when the cable is disconnected.

Dirty fiber optic cable connectors can impeded data transfer.

Before replacing a fiber optic cable, make sure that the connectors on the cable and LW GBIC are clean.

1. **Disconnect the fiber optic cable.**
2. **Lightly dip a cotton swab in a solution of pharmaceutical-grade isopropyl alcohol.**
3. **Use the swab and clean the inside of both connectors, as well as the insides of the LW GBICs and other connectors.**
4. **Reconnect the connectors.**

If the fiber optic cable still registers as being faulty, replace the fiber optic cable.

Specifications

This appendix contains specifications for the following components:

- LW GBIC—page A-2
- Single Mode Cable With Duplex SC Connectors—page A-5
- Single Mode Cable Plant—page A-7

A.1 LW GBIC

This section contains specifications for the LW GBIC. The LW GBIC meets or exceeds the Fibre Channel Standard 100-SM-LC-L specification.

A.1.1 Laser Safety

The LW GBIC is Class I Laser safe under single fault conditions for the when used with Sun-approved power sources at the operating temperatures specified in Section A.1.2 “Optical Characteristics” on page A-3.

TABLE A-1 Laser Safety Standards

| Parameter | References |
|-------------------------|-------------------------------------|
| International Standards | IEC825-1 and IEC 825-2 |
| FDA Standard | CDRH 21 CFR Ch1. Sub J Part 1040.10 |

FIGURE A-1 Laser Compliance Label

A.1.2 Optical Characteristics

TABLE A-2 Link

| Parameter | Min | Max |
|-----------------------------------|---------------------|-------|
| Nominal bit rate (B) | 1062.5±200 PPM Mb/s | |
| Operating range (L) | 2m | 10 Km |
| Loss budget | 10.5 dB | |
| Typical fiber core diameter (MFD) | 8.5 | 9.8 |

TABLE A-3 Transmitter

| Parameter | Min | Max |
|---|-------------|------------------------------|
| Spectral center frequency (l) | 1285 nm RMS | 1345 nm RMS |
| Spectral width (Δ l) | 0.5 nm RMS | 3 nm RMS |
| Launched power (P) | -8 dBm | -3 dBm |
| Relative intensity noise (RIN) | | -120 dB/Hz |
| Extinction ratio (Ex) | 9 dB | |
| Deterministic jitter (DJ) | | 0.20 UI ¹ (pk-pk) |
| Total jitter (TJ) | | 0.43 UI (pk-pk) |
| Optical rise and fall time ² | | 320 ps |

1. 1 UI=941 pico-seconds

2. The optical rise and fall time is 20%-80% unfiltered. If a 4th order Bessel Thompson filter is used, the unfiltered rise and fall time would be:

$$T_{\text{Rise/Fall}} = \sqrt{(T_{\text{rise/fall measured}})^2 - (T_{\text{rise/fall filter}})^2}$$

TABLE A-4 Receiver

| Parameter | Min | Max |
|---|-----------------|---------|
| Received power | -20 dBm | -3 dBm |
| Operating wavelength | 1270 nm | 1350 nm |
| Optical power penalty | | 4.2 dB |
| Return loss of receiver (RL) | 12 dB | |
| OE deterministic jitter added (DJ) ¹ | 0.17 UI (pk-pk) | |
| OE total jitter added (TJ) ¹ | 0.15 UI (pk-pk) | |

1. Amount of jitter added by the converter only.

A.1.3 Mechanical Specifications

TABLE 1-3 Mechanical Specifications

| Parameter | Specification |
|-----------------------------|------------------------|
| Optical Connector Insertion | 250 times ¹ |
| LW GBIC Insertion | 100 times ² |

1. The number of times SC Duplex connector can be inserted/removed into the LW GBIC.
 2. The number of times a LW GBIC unit can be inserted/removed in to the mating assembly.

A.1.4 Center Wavelength Versus Spectral Width

FIGURE A-2 Wavelength Versus Spectral Width

FC = FC Specification for 9.5 dB Power Budget

A.2 Single Mode Cable With Duplex SC Connectors

Cable assemblies comply with the EIA/TIA 492BAAA specification. The cable color is be yellow, and the connectors are be blue in compliance with Fibre Channel adapted color coding.

A.2.1 Environmental and Safety Specifications

TABLE A-5 Environmental and Safety Specifications

| Parameter | Min | Max |
|--|------------|------------|
| Storage temperature (at 5% to 95% RH) | -40 ° C | 80 ° C |
| Operating temperature (at 10% to 90% RH) | -10 ° C | 70 ° C |
| Flame retardance (OFNR) ¹ | 1666 | |
| Cable material minimum rating (UL-94) | V-1 | |

1. UL specification for cable flame retardation.

A.2.2 Optical and Mechanical Characteristics

TABLE A-6 Optical and Mechanical Characteristics

| Parameter | Min | Max |
|---|----------|---------|
| Mean optical connector loss ¹ | | 0.25 dB |
| Optical connector loss + 3s ¹ | | 0.5 dB |
| Connector optical return loss (RL) ² | | -30 dB |
| Fiber tensile proof test | 100 Kpsi | |
| Cable bend radius ³ | 30 mm | |
| Ferrule end radius | 10 mm | 25 mm |
| Connector apex offset | | 50 mm |
| Connector axial retention ⁴ | 90 N | |
| Insertion/withdrawal force | | 80 N |
| Off axial rotational pull ⁴ | 20 N | |
| Cable/connector pull strength | 90 N | |
| Mating durability/insertion | 500 | |

.1 Verified with OFSTP-7 method.
.2 Verified with FOTP-107 method.
.3 Excess loss is less than 0.5 dB if the fiber is wrapped around a 30-mm radius Mandrel once.
.4 Maximum optical loss variation is less than 0.5 dB.

A.2.3 Single Mode Optical Fiber Specifications

TABLE A-7 Single Mode Optical Fiber Specifications

| Parameter | Min | Max |
|--|--------------|--------------------------------|
| Fiber attenuation at 1310 nm ¹ | | 0.4 dB/Km |
| Excess attenuation ¹ | | 0.05 dB/Km |
| Zero dispersion wavelength (λ_0) | 1301.5 dB/Km | 1321 dB/Km |
| Zero dispersion slope (S0) | | 0.092 ps/(nm ² •Km) |

1. For a temperature range of -10° C to 85° C and 4% to 98% RH.

A.3 Single Mode Cable Plant

All cable plants must meet or exceed the requirements of EIA/TIA 492BAAA and use approved single mode optical fibers such as Corning SMF-28 or Lucent equivalent.

A.3.1 Connector Specification

TABLE A-8 Connector Specification

| Parameter | Max |
|---|---------|
| Mean optical connector loss ¹ | 0.25 dB |
| Optical connector loss + 3s ¹ | 0.5 dB |
| Connector optical return loss (RL) ² | -30 dB |

1. Verified with OFSTP-7 method.

2. Verified with FOTP-107 method.

A.3.2 Single Mode Optical Fiber Specifications

TABLE A-9 Single Mode Optical Fiber Specifications

| Parameter | Min | Max |
|--|-------------------|--------------------------------|
| Mode field diameter (MFD) | 8.8 μm | 9.8 μm |
| Cladding diameter | 124 μm | 126 μm |
| Cladding non-circularity | | 1% |
| Cable cutoff wavelength | | 1260 nm |
| Fiber attenuation at 1310 nm ¹ | | 0.4 dB/Km |
| Excess attenuation ¹ | | 0.05 dB/Km |
| Zero dispersion wavelength (λ_0) | 1301.5 dB/Km | 1321.5 dB/Km |
| Zero dispersion slope (S0) | | 0.092 ps/(nm ² •Km) |

1. For temperature range of -10° C to 85° C and 4% to 98% RH.
