Localized Documentation

The localized Sun Ray Server Software 1.3 documentation is available in PDF format in the CD-ROM image directory. For example:

```
/cdrom/cdrom0/Docs/Solaris_2.6+/locale/package/reloc/SUNWut/doc/locale/
```

where *locale* and *package* are according to the following table:

TABLE 1 Language, Locale, and Package

Language	Locale	Package
English	en	SUNWeutdo
French	fr	SUNWfutdo
Japanese	ja	SUNWjutdo
Korean	ko	SUNWkutdo
Simplified Chinese	zh	SUNWhutdo
Traditional Chinese	zh_TW	SUNWcutdo

Unlike the previous release, Japanese documentation is not installed automatically by the `utinstall` script. Documentation for all languages is installed using the `pkgadd` command.

▼ To Manually Install a Localized Documentation Package

This procedure uses locales and package names from TABLE 1.

1. From the shell window where you typed the `utinstall` command, change to the directory for your locale. For example:

```
# cd /cdrom/cdrom0/Docs/Solaris_2.6+/locale
```

2. Install the localized documentation package by typing:

```
# pkgadd -d . package
```

After installation, the localized documentation is available on the Sun Ray server at the following path:

```
/opt/SUNWut/doc/locale/
```
