Product Changes

The Sun StorEdge™ D240 media tray is now supported with the following additional software and hardware:

- Storage Subsystem Manager 2.0 software

You can download the *Storage Subsystem Manager 2.0 Software User’s Guide* from <http://www.sun.com/products-n-solutions/hardware/docs/pdf/806-5587-13.pdf>.

Also see “To Configure the Storage Subsystem Manager Software with the Name of the Sun StorEdge D240 Media Tray” on page 2 for an optional procedure.

- LVD SCSI host bus adapters (HBAs)-with 73 GByte media trays and with 36 GByte media trays made after November 2000

Ultra3 SCSI LVD connectivity is supported with 73 GByte media trays and with 36 GByte media trays made after November 2000. Ultra3 SCSI LVD connectivity is not supported with 18 GByte media trays.

Note – To identify 36 GByte media trays made before November 2000, check the serial number: 36 GByte serial trays made before the change-over date have serial numbers starting with xxxC, where x is a number.

▼ To Configure the Storage Subsystem Manager Software with the Name of the Sun StorEdge D240 Media Tray

This procedure is optional. It changes only the name of the media tray, which displays in messages from the software.

1. If the Storage Subsystem Manager software is running, stop it.

```
# /etc/init.d/ssmagemt stop
```

2. Change to the /etc/opt/SUNWssm directory.

```
# cd /etc/opt/SUNWssm
```

3. Use the editor of your choice to change “D130” to “D240” or to “D130/D240” in the STORAGE NAME variable in the ssmon.conf file.

```
# vi ssmon.conf
```

4. Start the Storage Subsystem Manager software.

```
# /etc/init.d/ssmagemt start
```
