

List of Enhancements and Defects Resolved In Data Protector A.06.00

List of Enhancements Implemented

CR Id	Title
QXCR1000094058	BSM sends invalid Session ID at backup preview
QXCR1000096232	DuplKey(21) - DbaUpdateMediumFromMMDB: d_recwrite in trans
QXCR1000100565	Enhancement request for ZDB backup of big Oracle8 databases.
QXCR1000101203	Missing "HP ESL E-Series" string is SCSI tab
QXCR1000102862	No objects in the IDB for SQL backup
QXCR1000103296	4000049621 - After configuring SSH the customer is unable to add clients
QXCR1000103551	Single Mailbox - Single Folder Restore (Orange BE)
QXCR1000103704	1204257485 - Oracle 8 restore GUI fails for instance names with "_"
QXCR1000103707	GUI/Restore Ora8/9 crashes while restoring Control file
QXCR1000103737	GUI passes wrong -report level to RSM - CLOSED
QXCR1000103742	Media scan seems to fail because of empty slot
QXCR1000106571	Cannot upgrade MA only client on Linux from A.05.00 to A.05.10 RC1 with
QXCR1000108101	DataProtector_ReadMe.pdf is very old
QXCR1000111104	TCE - enhance OB to allow ssh.
QXCR1000112639	TCE - Request for remote Installation using SSH
QXCR1000112667	ER on GUI in media pre-allocation part
QXCR1000112728	cleaning mechanism in restore session should be same as it is in backup
QXCR1000113628	Running email report hangs Data Protector GUI; omnirpt works fine
QXCR1000113649	create a free media pool for LTO tape and another for LTO-2
QXCR1000113725	Patches installed button for installation servers is misleading
QXCR1000113866	Under Tru64 with SSPUX510_024, cannot restore Oracle8 & Oracle9.
QXCR1000113929	Have Data Protector Acknowledge Reports Sent Via Email From GUI
QXCR1000113940	Please add ACL / Posix ACL support to Linux DA filesystems
QXCR1000114135	SAP-Integration UTIL_FILE_ONLINE
QXCR1000123552	NDMP Incremental backup selection allows selecting unsupported types
