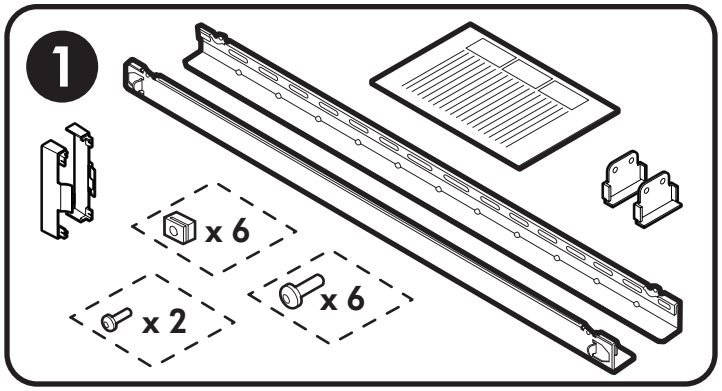
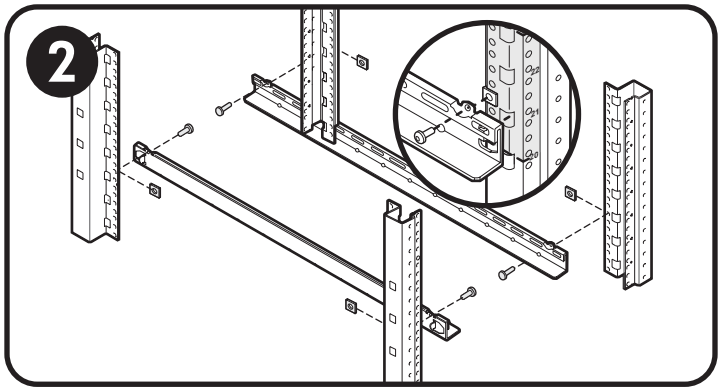
hp StorageWorks virtual array family

rack installation guide

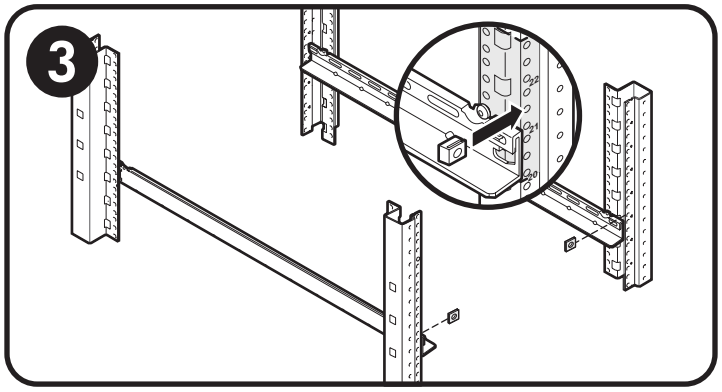
hp rack system/e



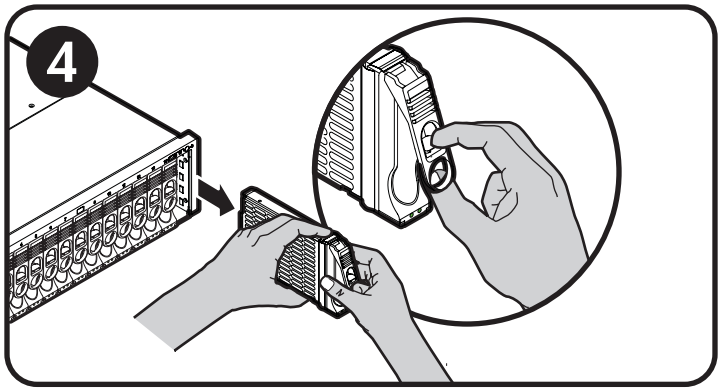
Inspect the contents of the rail kit.



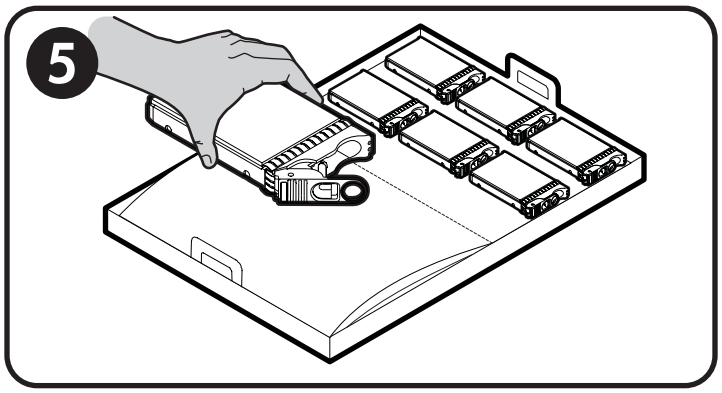
Install the rails and secure with four T25 screws.



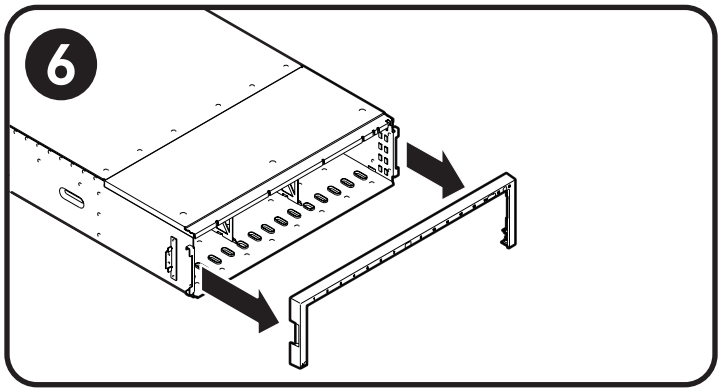
Install the front clip nuts.



Remove the disk modules.



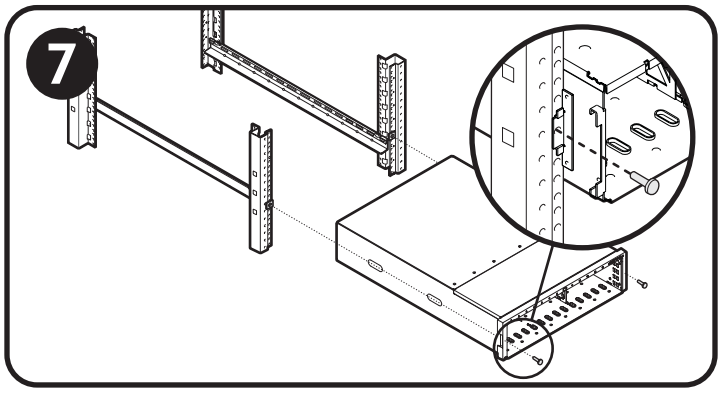
Carefully place the disk modules on the anti-static mat provided in the packaging.



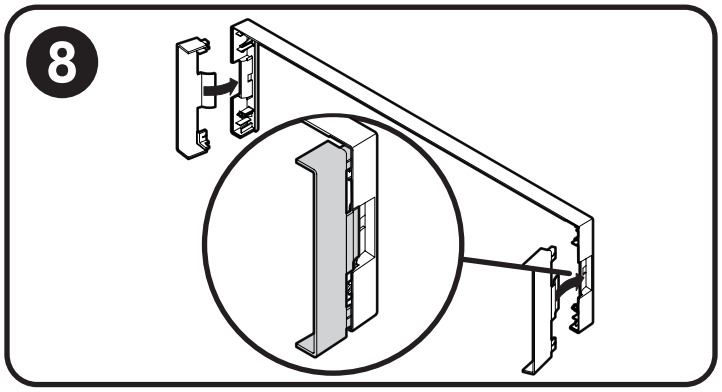
Remove the bezel.

WARNING!

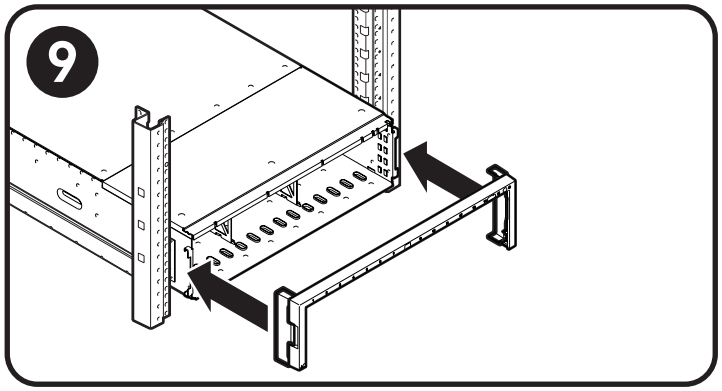
The empty enclosure may weigh over 60 pounds (27.2 kg). Two persons or a mechanical lift should be used to move the enclosure, or serious injury may result.



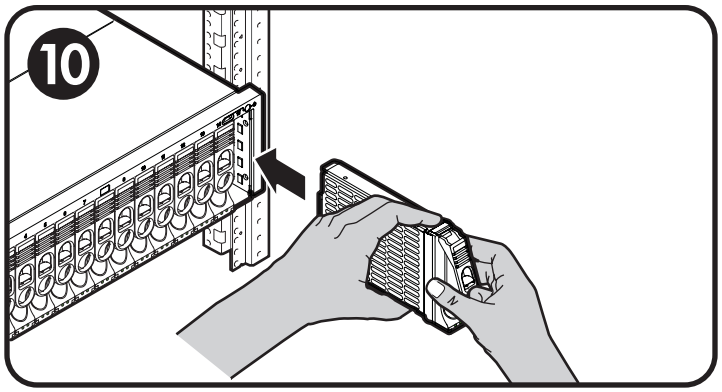
Install the enclosure and secure with two T25 screws.



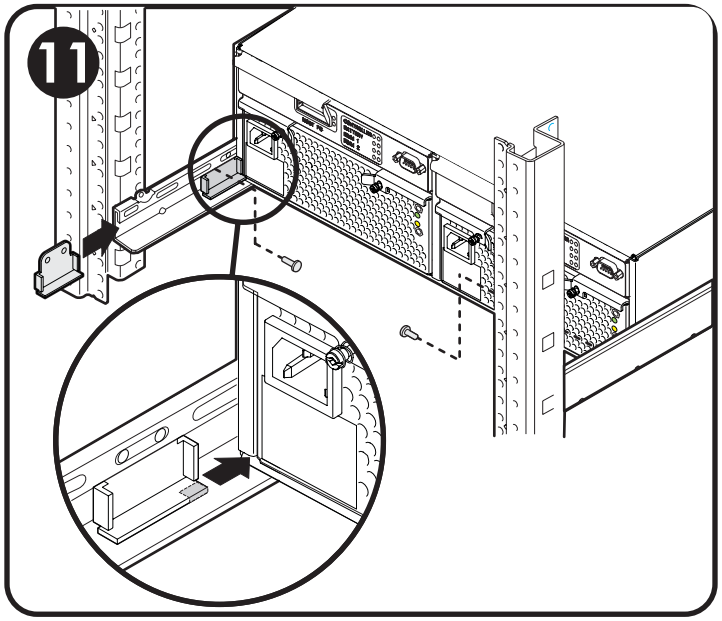
Install the bezel spacers.



Re-install the bezel.



Re-install the disk modules.



From the rear of the enclosure, install the rear tie down clamps and secure with two 10-32 screws.
